DETAILED ACTION

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 3. A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 1 recites the broad recitation "fish", and the claim also recites "such as shellfish" which is the narrower statement of the range/limitation. Further, in claim 3, use of "e.g." is

Application/Control Number: 10/520,509 Page 3

Art Unit: 3644

indefinite since it is indicative of an example, but not a positive recitation of what is being claimed.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Kirby (5,640,930). Kirby discloses a device for emptying an aquarium through a pipe (6) provided in the bottom section (3), wherein air is capable of being supplied into the container during emptying through holes (20) provided near the bottom section of the container; wherein the holes appear to be provided in a straight row pattern.

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kirby ('930) in view of Nakagawa et al. (4,807,615). Although Kirby discloses a method of

cion/Condon Number. 10/320,30

emptying an aquarium, the contents of the aquarium being shrimps, ice and water, is are not specifically disclosed. Nakagawa et al. teach a system for transporting and storing live fish wherein it is known that adding ice to the fish tank is a method of chilling the water. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide that the aquarium container of Kirby have hold a large capacity of water in order to accommodate a large volume of the selected aquatic life; and to provide that the aquarium contain ice would be obvious to keep the water chilled to keep the aquaculture such as shrimp alive, and to slow their movements as taught by Nakagawa et al. Further, to provide that the aquarium contain specifically shrimp is considered to be obvious to one skilled in the art and no more than one of a variety of aquatic species capable of being stored or transported in the containers of Kirby and Nakagawa et al.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yvonne R. Abbott whose telephone number is (571) 272-6896. The examiner can normally be reached on Monday-Thursday 9:30am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teri Luu can be reached on (571) 272-7045. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
